

PALLA JANAKIRAM

DATA ANALYST

Hyderabad, Telangana | +91 9866804339 | janakiram.palla01@gmail.com | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience working with structured datasets, data validation, quality analysis, reporting and geospatial data workflows. Skilled in SQL, Python, Pandas, Excel, Power BI, PostgreSQL, data cleaning, KPI analysis, visualization and dimensional modeling. Built end-to-end banking and healthcare analytics portfolio solutions combining business analysis, data modeling, automated validation and interactive BI dashboards.

TECHNICAL SKILLS

Data Analytics: SQL, Python, Pandas, NumPy, Excel, data cleaning, data validation, EDA, KPI analysis, business analysis | **Business Intelligence:** Power BI, DAX, Power Query, data visualization, dimensional modeling | **Databases:** PostgreSQL | **Modern Analytics:** PySpark, Apache Spark, Delta Lake, dbt, medallion architecture, Airflow DAG design | **Tools:** Git, GitHub, ArcGIS Pro, Google Earth Pro, KML/KMZ

PROFESSIONAL EXPERIENCE

Sr. Associate - Customer Support (Technical Support) | Tech Mahindra

Mar 2026 - Present

- Analyze and validate structured geospatial and map data against defined mapping specifications and business rules, identifying inconsistencies and maintaining data accuracy.
- Perform quality checks across road-network features, including lanes, intersections, crosswalks, bike lanes and parking areas, to ensure completeness and consistency.
- Investigate data discrepancies and edge cases, document findings, and coordinate corrections through established quality workflows.

Technical Support Engineer | Blue Dome Technologies

Jan 2024 - Dec 2025

- Extracted, cleaned, validated and analyzed structured roadway and infrastructure datasets using Excel, Python and GIS tools, identifying missing, duplicate and inconsistent records.
- Processed and reconciled GPS/KML data, spatial attributes and source imagery to maintain accurate asset-level datasets and analytical deliverables.
- Prepared structured Excel/CSV and geospatial outputs for downstream analysis and reporting while coordinating resolution of data-quality issues.

SELECTED PROJECTS

FinTrust Banking Intelligence | Portfolio Project

2026

- Analyzed 5,000 customers and 120,000 transactions across deposits, lending, fraud, credit risk, collections and churn using SQL, Python and reconciled KPI logic.
- Built a six-page Power BI dashboard with a dimensional model, DAX measures and decision-focused reporting; validated 108 report elements and ten headline KPIs.
- Implemented a local Bronze-Silver-Gold pipeline using PySpark and Delta Lake, with 11 dbt models, 12 passing dbt tests, automated quality checks and an eight-task Airflow DAG design.

MediCore Healthcare Analytics | Portfolio Project

2026

- Analyzed synthetic multi-hospital operations covering 500,000 appointments and 300,000 encounters using PostgreSQL, SQL, Python and Pandas.
- Validated healthcare KPIs for revenue, collections, patient flow, no-shows, wait times, satisfaction and readmissions, translating results into business insights.
- Built interactive Power BI and Plotly Dash reporting for operational and financial performance analysis.
