

PALLA JANAKIRAM

DATA ANALYST

SQL | PYTHON | EXCEL | POWER BI

Hyderabad, Telangana | +91 9866804339 | janakiram.palla01@gmail.com | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience extracting, cleaning, transforming, validating and analyzing structured operational datasets. Uses SQL, Python/Pandas, Excel, PostgreSQL, Power BI and DAX to develop KPIs, dimensional models, dashboards and business insights across banking and healthcare. Applies modern analytics and Generative AI-assisted workflows to accelerate development while independently validating final logic and outputs.

TECHNICAL SKILLS

Data Analytics: SQL, Python, Pandas, NumPy, Excel, data cleaning, transformation, validation, EDA, statistical analysis, KPI analysis, business analysis | **Business Intelligence:** Power BI, DAX, Power Query, data visualization, dashboard development, dimensional modeling, data storytelling | **Database:** PostgreSQL | **Modern Analytics:** PySpark, Apache Spark, Delta Lake, dbt, medallion architecture, Airflow DAG design, incremental processing, automated data quality | **AI-Assisted Analytics:** ChatGPT, Microsoft Copilot, SQL/Python and formula troubleshooting, workflow optimization, documentation | **Tools:** Git, GitHub, ArcGIS Pro, Google Earth Pro

PROFESSIONAL EXPERIENCE

Senior Associate | Tech Mahindra

Mar 2026 - Present

- Analyze and validate high-volume structured operational and location-based datasets against defined specifications and business rules, identifying inconsistencies and maintaining accuracy.
- Execute quality controls and consistency checks across complex data attributes to detect exceptions, incomplete records and conflicting values.
- Investigate edge cases and root causes, document findings and coordinate correction workflows to maintain reliable analytical datasets.

Analyst | Blue Dome Technologies

Jan 2024 - Dec 2025

- Extracted, cleaned, transformed and validated multi-source structured datasets using Python, Pandas, Excel and GIS tools, producing analysis-ready outputs.
- Profiled and reconciled asset attributes, GPS/KML records and source imagery to identify missing, duplicate, anomalous and inconsistent records.
- Applied business-rule validation and quality audits, prepared analytical datasets and structured reports, and coordinated resolution of recurring data exceptions.

SELECTED PROJECTS

FinTrust Banking Intelligence | End-to-End Banking Analytics & Modern BI Platform

2026

- Unified customer, transaction, deposit, lending, fraud, collection, churn and branch data to support management analysis of behavior, trends, portfolio risk and operating performance.
- Cleaned, joined, transformed and validated 257,969 records; used SQL and Python/Pandas to calculate and reconcile KPIs across 5,000 customers and 120,000 transactions.
- Built a six-page interactive Power BI solution using Power Query, dimensional modeling, DAX measures, synchronized filters and decision-focused trend and drill-down analysis.
- Implemented a local PySpark/Delta Lake Bronze-Silver-Gold pipeline with incremental processing, 11 dbt models, 12 passing dbt tests, 8 repository tests and an eight-task Airflow DAG design.

MediCore Healthcare Analytics | Healthcare Revenue, Patient Flow & Operational Intelligence

2026

- Integrated and analyzed 500,000 appointments and 300,000 encounters using PostgreSQL, SQL and Python/Pandas to create a centralized view of patient flow and hospital performance.
- Cleaned and validated healthcare data, performed EDA and calculated KPIs including 9.81% no-shows, 62.86% collections, 62.18-minute waits, 74.61 satisfaction and 3.65% readmissions.
- Built Power BI and Plotly Dash reporting for revenue and collections (₹178.13 Cr billed; ₹111.98 Cr collected), no-shows, patient experience, wait times and readmission risk.
